Letter of Support

To Whom It May Concern,

I have worked with Direct National for many years across a number of schools. Direct National has always provided me with high level expertise when offering solutions to interactive technologies in my schools.

Direct National have always been very professional in their dealings with my school and have always followed EQ requirements including asbestos, sign in procedures and school policy. During the quotation process, Direct National provides you with detailed quotes and respects the EQ purchasing process. The follow up service when items do not work correctly have also been exemplary. Direct National are certainly a company that are in tune with how schools operate and are wonderful to work with.

Kind Regards,

Clayton Carnes

Clayton Carnes
